# Contents

<b>1</b>	<b>Introduction . . . . .</b>	<b>1</b>
	A Selection of Books on Optical Mineralogy, Books with a Chapter on Optical Mineralogy, and Publications Relevant to the Subject . . . . .	3
<b>2</b>	<b>Basic Concepts . . . . .</b>	<b>7</b>
2.1	Light as the Tool of Examination in Optical Mineralogy . . . . .	7
2.2	Refractive Index, Dispersion, Polarization, and Double Refraction . . . . .	9
2.3	Retardation of Rays in Anisotropic Minerals and Birefringence . . . . .	14
2.4	Passage of Light Through Crystalline Matter: Optic Orientation and the Optical Indicatrix . . . . .	17
2.5	Location of the Optical Indicatrix with Reference to the Crystal Systems and Crystallographic Directions . . . . .	20
2.5.1	Location of the Optical Indicatrix in Isotropic Minerals . . . . .	21
2.5.2	Location of the Optical Indicatrix in Uniaxial Minerals . . . . .	21
2.5.3	Location of the Optical Indicatrix in Biaxial Minerals . . . . .	24
2.6	Understanding How a Mineral is Cut in a Thin Section . . . . .	27
	References and Suggested Further References . . . . .	34
<b>3</b>	<b>The Petrographic Microscope: A Polarized Light Microscope . . . . .</b>	<b>37</b>
3.1	Substage Assembly . . . . .	38
3.2	Upperstage Assembly . . . . .	39
3.3	Circular Rotating Microscopic Stage and Objective Lens Revolver . . . . .	40
3.4	Objective Lenses . . . . .	41
3.5	Accessory Plates (Retardation Plates, Compensator Plates) . . . . .	42
3.6	Adjustment of the Microscope . . . . .	43
3.6.1	Checking the Orientation of the Polarizer and the Correct Alignment of the Analyzer . . . . .	43
3.6.2	Adjustment of the Oculars . . . . .	44

---

3.6.3	Centering the Objective Lenses . . . . .	44
3.6.4	Calibrating the Ocular Micrometer . . . . .	46
3.6.5	Adjustment of the Aperture Diaphragm . . . . .	46
3.6.6	Focusing and Centering the Condenser . . . . .	47
3.6.7	Adjustment of the Field Diaphragm . . . . .	47
3.7	The Object of Study: The Thin Section . . . . .	48
3.8	Illumination and Comfort While Working at the Microscope . . . . .	48
	References and Suggested Further Reading . . . . .	48
<b>4</b>	<b>Optical Properties of Minerals in Plane Polarized Light (PPL) . . . . .</b>	<b>49</b>
4.1	Color and Pleochroism . . . . .	49
4.1.1	Appearance of Color in Thin Section . . . . .	50
4.1.2	Intensity of Color . . . . .	54
4.1.3	Pleochroism . . . . .	55
4.1.4	Causes of Color . . . . .	59
4.2	Crystal Habit and Textural Relationships . . . . .	63
4.2.1	Appearance of Crystal Habit . . . . .	63
4.2.2	Causes of Different Habit . . . . .	69
4.3	Relief . . . . .	73
4.3.1	Appearance of relief . . . . .	73
4.3.2	Mathematical Formulation of Relief Formation Between Air and Mineral . . . . .	74
4.3.3	Formation of Relief Between Minerals and the Becke Line Method . . . . .	77
4.4	Cleavage . . . . .	79
4.4.1	Appearance of Cleavage . . . . .	79
4.4.2	Causes of cleavage . . . . .	81
	References . . . . .	85
<b>5</b>	<b>Optical Properties of Minerals in Cross Polarized Light (XPL) . . . . .</b>	<b>87</b>
5.1	Birefringence . . . . .	87
5.1.1	Appearance of Birefringence . . . . .	87
5.1.2	The Michel-Lévy and the Raith-Sørensen Interference Color Charts . . . . .	89
5.1.3	How to Determine the Maximum Interference Color of a Mineral . . . . .	95
5.1.4	Transmission of Light by the Analyzer and Extinction Behavior . . . . .	99
5.1.5	Extinction Angle and Types of Extinction . . . . .	105
5.2	Elongation . . . . .	112
5.3	Twinning . . . . .	114
5.3.1	Appearance of Twinning . . . . .	114
5.3.2	Types of Twinning . . . . .	114
5.3.3	Causes of Twinning . . . . .	117
5.4	Crystal Zoning . . . . .	118
5.4.1	Oscillatory Zoning . . . . .	118

---

5.4.2 Concentric Zoning . . . . .	122
5.4.3 Sector or Sectoral Zoning . . . . .	122
References . . . . .	123
<b>6 Conoscopic Observations and Interference Figures . . . . .</b>	125
6.1 Interference Figures of Uniaxial Minerals . . . . .	126
6.1.1 Uniaxial Centered Optic Axis Figure (OA Figure) . . . . .	128
6.1.2 Uniaxial Off-Centered Interference Figure . . . . .	131
6.1.3 Flash Figure of Uniaxial Minerals . . . . .	131
6.1.4 Genge's Birefringence Ball of Uniaxial Minerals . . . . .	131
6.2 Interference Figures of Biaxial Minerals . . . . .	134
6.2.1 Bxa Figure . . . . .	137
6.2.2 Biaxial-Centered Optic Axis Figure (OA Figure) . . . . .	137
6.2.3 Flash Figure of Biaxial Minerals . . . . .	141
6.2.4 Genge's Birefringence Ball of Biaxial Minerals . . . . .	141
6.2.5 Determination of the 2V Angle in Biaxial Minerals . . . . .	141
6.3 How to Obtain an Interference Figure . . . . .	143
References and Books with Chapters on Conoscopic Observations . . . . .	143
<b>7 Igneous Rocks: Some Basic Concepts . . . . .</b>	145
7.1 Classification of Igneous Rocks . . . . .	145
7.1.1 Classification Based on Modal Composition . . . . .	146
7.1.2 Classification Based on Texture . . . . .	150
7.2 Chemical Classification of Igneous Rocks . . . . .	156
References and Suggested Further Reading . . . . .	159
<b>8 Metamorphic Rocks: Some Basic Concepts . . . . .</b>	161
8.1 Classification of Metamorphic Rocks . . . . .	163
8.1.1 Textures of Metamorphic Rocks . . . . .	163
8.1.2 Modal Composition and Mineral Assemblage . . . . .	165
8.1.3 Protolith . . . . .	170
8.2 Common Textures in Metamorphic Rocks . . . . .	170
Selection of Books on Metamorphic Petrology and Cited Reference . . . . .	177
<b>9 The Mineral Plates and How to Use Them . . . . .</b>	179
9.1 Introduction to the Mineral Plates . . . . .	179
9.2 Mineral Plates . . . . .	187
Some References for the Determination of Minerals in Thin Section . . . . .	262
<b>Appendix A: Abbreviation of Minerals . . . . .</b>	263
<b>Appendix B: Transfer-Matrix Formalism for the Extinction Behavior in Anisotropic Minerals . . . . .</b>	265
<b>Appendix C: Examples of Examination Questions . . . . .</b>	267
<b>Index . . . . .</b>	271
