1	<b>Introduction and History of Research</b> .....	1
1.1	Object of Research.....	3
1.2	History of Research.....	5
	References.....	11
2	<b>Origin of Glaciers</b> .....	13
2.1	Preconditions for Glacier Formation.....	14
2.2	Processes Involved.....	16
2.2.1	Snowfall.....	16
2.2.2	Snow Metamorphosis.....	18
2.2.3	Densification of the Snow.....	18
2.3	Physical Properties of Glacial Ice.....	20
	References.....	24
3	<b>Ice Movement</b> .....	25
3.1	Description of the Movement Pattern.....	26
3.2	Processes Involved in Ice Movement.....	30
3.2.1	Internal Deformation.....	30
3.2.2	Basal Sliding.....	33
3.2.3	Bed Deformation.....	34
3.2.4	Glacier Flow Velocity.....	34
3.3	Special Case Surge.....	35
3.4	Visible Witnesses of Ice Movement: Crevasses and Ogives.....	37
	References.....	40
4	<b>Mass and Energy Balance of Glaciers</b> .....	43
4.1	Glacier Mass Balance.....	44
4.1.1	Concept and Components of the Glacier Mass Balance.....	45
4.1.2	Methods of Mass Balance Determination.....	49
4.1.3	Mass Balance Measurements Worldwide.....	54
4.2	Energy Balance of Glacier Surfaces.....	56
	References.....	59
5	<b>Glacier Types and Distribution</b> .....	61
5.1	Typification of Glaciers.....	62
5.1.1	Typification According to the Source of Nourishment.....	62
5.1.2	Morphological Glacier Types.....	65
5.1.3	Thermal Glacier Types.....	67
5.2	Distribution of Glaciers.....	68
	References.....	70

6	<b>Glaciers and Climate</b> .....	73
6.1	<b>Climatic Control of Glacier Behaviour</b> .....	74
6.2	<b>Glaciers as Climate Indicators</b> .....	76
	References.....	81
7	<b>Glaciers and Water</b> .....	83
7.1	<b>Glacial Hydrological Systems</b> .....	85
7.1.1	Supraglacial System .....	85
7.1.2	Intraglacial System.....	88
7.1.3	Subglacial System .....	91
7.2	<b>Runoff from Glaciers</b> .....	92
	References.....	94
8	<b>Glacial History</b> .....	97
8.1	<b>Methods for the Reconstruction of Glacial History</b> .....	98
8.2	<b>Glacial Periods</b> .....	102
8.2.1	The Older Ice Ages .....	104
8.2.2	The Pleistocene .....	105
8.3	<b>Glacier Evolution in the Holocene</b> .....	111
8.4	<b>Current and Future Glacier Retreat</b> .....	112
8.5	<b>Consequences of Glacier Retreat</b> .....	115
8.5.1	Local Consequences.....	115
8.5.2	Regional Consequences .....	115
8.5.3	Global Consequences .....	117
	References.....	118
9	<b>Glacial Hazards</b> .....	121
9.1	<b>Ice Avalanches</b> .....	122
9.1.1	Definition and Classification .....	122
9.1.2	Examples .....	123
9.1.3	Risk Management .....	128
9.2	<b>Glacial Lake Outburst Floods</b> .....	128
9.2.1	Classification and Examples .....	128
9.2.2	Breakout Mechanisms .....	132
9.2.3	Risk Management .....	132
	References.....	133
10	<b>Glacial Erosion</b> .....	135
10.1	<b>Erosion Processes in Solid Rock</b> .....	136
10.2	<b>Erosion Processes in Unconsolidated Rocks</b> .....	139
10.3	<b>Erosion Rates</b> .....	140
10.4	<b>Landforms of Glacial Erosion</b> .....	141
	References.....	150

11	<b>Glacial Sedimentation</b> .....	151
11.1	Processes of Glacial Accumulation .....	152
11.2	Till .....	152
11.3	Moraine Types .....	156
11.4	Special Forms .....	160
11.5	Glaciofluvial Landforms .....	161
11.6	The Glacial Series .....	164
	References .....	165
	 <b>Supplementary Information</b>	
	Glossary .....	168
	Index .....	183
