Introduction	1
Chapter I. Modules, Diagrams, and Functors	8
1. The Arrow Notation	8
2. Modules	9
3. Diagrams	13
4. Direct Sums	15
5. Free and Projective Modules	19
6. The Functor Hom	21
7. Categories	25
8. Functors	28
Chapter II. Homology of Complexes	34
1. Differential Groups	35
2. Complexes	39
3. Cohomology	42
4. The Exact Homology Sequence	44
5. Some Diagram Lemmas	49
6. Additive Relations	51
7. Singular Homology	54
8. Homotopy	57
9. Axioms for Homology	61
Chapter III. Extensions and Resolutions	63
1. Extensions of Modules	63
2. Addition of Extensions	67
3. Obstructions to the Extension of Homomorphisms	72
4. The Universal Coefficient Theorem for Cohomology	76
5. Composition of Extensions	82
6. Resolutions	87
7. Injective Modules	92
8. Injective Resolutions	95
9. Two Exact Sequences for Ext^n	96
10. Axiomatic Description of Ext	99
11. The Injective Envelope	102
Chapter IV. Cohomology of Groups	103
1. The Group Ring	104
2. Crossed Homomorphisms	105
3. Group Extensions	108
4. Factor Sets	111
5. The Bar Resolution	114
6. The Characteristic Class of a Group Extension	120

Table of Contents

IX

	page
7. Cohomology of Cyclic and Free Groups	121
8. Obstructions to Extensions	124
9. Realization of Obstructions	129
10. SCHUR's Theorem	131
11. Spaces with Operators	134
Chapter V. Tensor and Torsion Products	138
1. Tensor Products	138
2. Modules over Commutative Rings	141
3. Bimodules	142
4. Dual Modules	146
5. Right Exactness of Tensor Products	148
6. Torsion Products of Groups	150
7. Torsion Products of Modules	154
8. Torsion Products by Resolutions	159
9. The Tensor Product of Complexes	163
10. The KÜNNETH Formula	166
11. Universal Coefficient Theorems	170
Chapter VI. Types of Algebras	173
1. Algebras by Diagrams	173
2. Graded Modules	175
3. Graded Algebras	177
4. Tensor Products of Algebras	181
5. Modules over Algebras	184
6. Cohomology of free Abelian Groups	187
7. Differential Graded Algebras	189
8. Identities on Hom and \otimes	193
9. Coalgebras and HOPF Algebras	197
Chapter VII. Dimension	200
1. Homological Dimension	200
2. Dimensions in Polynomial Rings	204
3. Ext and Tor for Algebras	206
4. Global Dimensions of Polynomial Rings	210
5. Separable Algebras	211
6. Graded Syzygies	215
7. Local Rings	218
Chapter VIII. Products	220
1. Homology Products	220
2. The Torsion Product of Algebras	224
3. A Diagram Lemma	227
4. External Products for Ext	228
5. Simplicial Objects	233
6. Normalization	236
7. Acyclic Models	237
8. The EILENBERG-ZILBER Theorem	238
9. Cup Products	244
Chapter IX. Relative Homological Algebra	248
1. Additive Categories	249
2. Abelian Categories	254

	page
3. Categories of Diagrams	257
4. Comparison of Allowable Resolutions	260
5. Relative Abelian Categories	262
6. Relative Resolutions	265
7. The Categorical Bar Resolution	270
8. Relative Torsion Products	273
9. Direct Products of Rings	278
Chapter X. Cohomology of Algebraic Systems	280
1. Introduction	280
2. The Bar Resolution for Algebras	280
3. The Cohomology of an Algebra	283
4. The Homology of an Algebra	288
5. Homology of Groups and Monoids	290
6. Ground Ring Extensions and Direct Products	293
7. Homology of Tensor Products	295
8. The Case of Graded Algebras	298
9. Complexes of Complexes	301
10. Resolutions and Constructions	303
11. Two-stage Cohomology of DGA-Algebras	308
12. Cohomology of Commutative DGA-Algebras	311
13. Homology of Algebraic Systems	315
Chapter XI. Spectral Sequences	318
1. Spectral Sequences	318
2. Fiber Spaces	322
3. Filtered Modules	326
4. Transgression	332
5. Exact Couples	336
6. Bicomplexes	340
7. The Spectral Sequence of a Covering	342
8. Cohomology Spectral Sequences	345
9. Restriction, Inflation, and Connection	345
10. The Lyndon Spectral Sequence	351
11. The Comparison Theorem	357
Chapter XII. Derived Functors	358
1. Squares	359
2. Subobjects and Quotient Objects	361
3. Diagram Chasing	364
4. Proper Exact Sequences	367
5. Ext without Projectives	371
6. The Category of Short Exact Sequences	375
7. Connected Pairs of Additive Functors	379
8. Connected Sequences of Functors	386
9. Derived Functors	389
10. Products by Universality	394
11. Proper Projective Complexes	397
12. The Spectral KÜNNETH Formula	400
Bibliography	404
List of Standard Symbols	413
Index	415
