# Table of Contents

<b>Preface</b> .....	<b>ix</b>
<b>1. Python and Algorithmic Trading</b> .....	<b>1</b>
Python for Finance	1
Python Versus Pseudo-Code	2
NumPy and Vectorization	3
pandas and the DataFrame Class	5
Algorithmic Trading	7
Python for Algorithmic Trading	11
Focus and Prerequisites	13
Trading Strategies	13
Simple Moving Averages	14
Momentum	14
Mean Reversion	14
Machine and Deep Learning	15
Conclusions	15
References and Further Resources	15
<b>2. Python Infrastructure</b> .....	<b>17</b>
Conda as a Package Manager	19
Installing Miniconda	19
Basic Operations with Conda	22
Conda as a Virtual Environment Manager	27
Using Docker Containers	30
Docker Images and Containers	31
Building a Ubuntu and Python Docker Image	31
Using Cloud Instances	36
RSA Public and Private Keys	38

Jupyter Notebook Configuration File	38
Installation Script for Python and Jupyter Lab	40
Script to Orchestrate the Droplet Set Up	41
Conclusions	43
References and Further Resources	44
<b>3. Working with Financial Data</b>	<b>45</b>
Reading Financial Data From Different Sources	46
The Data Set	46
Reading from a CSV File with Python	47
Reading from a CSV File with pandas	49
Exporting to Excel and JSON	50
Reading from Excel and JSON	51
Working with Open Data Sources	52
Eikon Data API	55
Retrieving Historical Structured Data	58
Retrieving Historical Unstructured Data	62
Storing Financial Data Efficiently	65
Storing DataFrame Objects	66
Using TsTables	70
Storing Data with SQLite3	75
Conclusions	77
References and Further Resources	78
Python Scripts	78
<b>4. Mastering Vectorized Backtesting</b>	<b>81</b>
Making Use of Vectorization	82
Vectorization with NumPy	83
Vectorization with pandas	85
Strategies Based on Simple Moving Averages	88
Getting into the Basics	89
Generalizing the Approach	97
Strategies Based on Momentum	98
Getting into the Basics	99
Generalizing the Approach	104
Strategies Based on Mean Reversion	107
Getting into the Basics	107
Generalizing the Approach	110
Data Snooping and Overfitting	111
Conclusions	113
References and Further Resources	113
Python Scripts	115

SMA Backtesting Class	115
Momentum Backtesting Class	118
Mean Reversion Backtesting Class	120
<b>5. Predicting Market Movements with Machine Learning</b>	<b>123</b>
Using Linear Regression for Market Movement Prediction	124
A Quick Review of Linear Regression	125
The Basic Idea for Price Prediction	127
Predicting Index Levels	129
Predicting Future Returns	132
Predicting Future Market Direction	134
Vectorized Backtesting of Regression-Based Strategy	135
Generalizing the Approach	137
Using Machine Learning for Market Movement Prediction	139
Linear Regression with scikit-learn	139
A Simple Classification Problem	141
Using Logistic Regression to Predict Market Direction	146
Generalizing the Approach	150
Using Deep Learning for Market Movement Prediction	153
The Simple Classification Problem Revisited	154
Using Deep Neural Networks to Predict Market Direction	156
Adding Different Types of Features	162
Conclusions	166
References and Further Resources	166
Python Scripts	167
Linear Regression Backtesting Class	167
Classification Algorithm Backtesting Class	170
<b>6. Building Classes for Event-Based Backtesting</b>	<b>175</b>
Backtesting Base Class	177
Long-Only Backtesting Class	182
Long-Short Backtesting Class	185
Conclusions	190
References and Further Resources	190
Python Scripts	191
Backtesting Base Class	191
Long-Only Backtesting Class	194
Long-Short Backtesting Class	197
<b>7. Working with Real-Time Data and Sockets</b>	<b>201</b>
Running a Simple Tick Data Server	203
Connecting a Simple Tick Data Client	206

Signal Generation in Real Time	208
Visualizing Streaming Data with Plotly	211
The Basics	211
Three Real-Time Streams	212
Three Sub-Plots for Three Streams	214
Streaming Data as Bars	215
Conclusions	217
References and Further Resources	218
Python Scripts	218
Sample Tick Data Server	218
Tick Data Client	219
Momentum Online Algorithm	219
Sample Data Server for Bar Plot	220
<b>8. CFD Trading with Oanda.....</b>	<b>223</b>
Setting Up an Account	227
The Oanda API	229
Retrieving Historical Data	230
Looking Up Instruments Available for Trading	230
Backtesting a Momentum Strategy on Minute Bars	231
Factoring In Leverage and Margin	234
Working with Streaming Data	236
Placing Market Orders	237
Implementing Trading Strategies in Real Time	239
Retrieving Account Information	244
Conclusions	246
References and Further Resources	247
Python Script	247
<b>9. FX Trading with FXCM.....</b>	<b>249</b>
Getting Started	251
Retrieving Data	251
Retrieving Tick Data	252
Retrieving Candles Data	254
Working with the API	256
Retrieving Historical Data	257
Retrieving Streaming Data	259
Placing Orders	260
Account Information	262
Conclusions	263
References and Further Resources	264

<b>10. Automating Trading Operations.....</b>	<b>265</b>
Capital Management	266
Kelly Criterion in Binomial Setting	266
Kelly Criterion for Stocks and Indices	272
ML-Based Trading Strategy	277
Vectorized Backtesting	278
Optimal Leverage	285
Risk Analysis	287
Persisting the Model Object	290
Online Algorithm	291
Infrastructure and Deployment	296
Logging and Monitoring	297
Visual Step-by-Step Overview	299
Configuring Oanda Account	299
Setting Up the Hardware	300
Setting Up the Python Environment	301
Uploading the Code	302
Running the Code	302
Real-Time Monitoring	304
Conclusions	304
References and Further Resources	305
Python Script	305
Automated Trading Strategy	305
Strategy Monitoring	308
<b>Appendix. Python, NumPy, matplotlib, pandas.....</b>	<b>309</b>
<b>Index.....</b>	<b>351</b>
