About the Authors	XI
About the Technical Reviewer	XV
Acknowledgments	XVII
Preface to the Second Edition	XIX
1 What Is Deep Learning?	1
1.1 Deep Learning	1
1.2 History of Deep Learning	2
1.3 Neural Nets	4
1.3.1 Daylight Detector	7
1.3.2 XOR Neural Net	8
1.4 Deep Learning and Data	16
1.5 Types of Deep Learning	18
1.5.1 Multi-layer Neural Network	18
1.5.2 Convolutional Neural Network (CNN)	18
1.5.3 Recurrent Neural Network (RNN)	18
1.5.4 Long Short-Term Memory Network (LSTM)	19
1.5.5 Recursive Neural Network	19
1.5.6 Temporal Convolutional Machine (TCM)	19
1.5.7 Stacked Autoencoders	19
1.5.8 Extreme Learning Machine (ELM)	19
1.5.9 Recursive Deep Learning	19
1.5.10 Generative Deep Learning	20
1.5.11 Reinforcement Learning	20
1.6 Applications of Deep Learning	20
1.7 Organization of the Book	22

2	MATLAB Toolboxes	25
2.1	Commercial MATLAB Software	25
2.1.1	MathWorks Products	25
2.2	MATLAB Open Source	27
2.3	XOR Example	28
2.4	Training	37
2.5	Zermelo’s Problem	38
3	Finding Circles	41
3.1	Introduction	41
3.2	Structure	41
3.2.1	imageInputLayer	42
3.2.2	convolution2dLayer	42
3.2.3	batchNormalizationLayer	44
3.2.4	reluLayer	44
3.2.5	maxPooling2dLayer	46
3.2.6	fullyConnectedLayer	46
3.2.7	softmaxLayer	47
3.2.8	classificationLayer	47
3.2.9	Structuring the Layers	48
3.3	Generating Data	49
3.3.1	Problem	49
3.3.2	Solution	49
3.3.3	How It Works	49
3.4	Training and Testing	54
3.4.1	Problem	54
3.4.2	Solution	54
3.4.3	How It Works	54
4	Classifying Movies	63
4.1	Introduction	63
4.2	Generating a Movie Database	63
4.2.1	Problem	63
4.2.2	Solution	63
4.2.3	How It Works	63
4.3	Generating a Viewer Database	66
4.3.1	Problem	66
4.3.2	Solution	66
4.3.3	How It Works	66
4.4	Training and Testing	68
4.4.1	Problem	68

CONTENTS

4.4.2	Solution	68
4.4.3	How It Works	69
5	Algorithmic Deep Learning	75
5.1	Building the Filter	79
5.1.1	Problem	79
5.1.2	Solution	79
5.1.3	How It Works	80
5.2	Simulating	82
5.2.1	Problem	82
5.2.2	Solution	82
5.2.3	How It Works	82
5.3	Testing and Training	85
5.3.1	Problem	85
5.3.2	Solution	85
5.3.3	How It Works	86
6	Tokamak Disruption Detection	89
6.1	Introduction	89
6.2	Numerical Model	91
6.2.1	Dynamics	91
6.2.2	Sensors	94
6.2.3	Disturbances	94
6.2.4	Controller	96
6.3	Dynamical Model	98
6.3.1	Problem	98
6.3.2	Solution	98
6.3.3	How It Works	98
6.4	Simulate the Plasma	101
6.4.1	Problem	101
6.4.2	Solution	101
6.4.3	How It Works	101
6.5	Control the Plasma	104
6.5.1	Problem	104
6.5.2	Solution	104
6.5.3	How It Works	104
6.6	Training and Testing	106
6.6.1	Problem	106
6.6.2	Solution	106
6.6.3	How It Works	107

7	Classifying a Pirouette	113
7.1	Introduction	113
7.1.1	Inertial Measurement Unit	115
7.1.2	Physics	116
7.2	Data Acquisition	118
7.2.1	Problem	118
7.2.2	Solution	119
7.2.3	How It Works	119
7.3	Orientation	124
7.3.1	Problem	124
7.3.2	Solution	124
7.3.3	How It Works	124
7.4	Dancer Simulation	126
7.4.1	Problem	126
7.4.2	Solution	126
7.4.3	How It Works	126
7.5	Real-Time Plotting	130
7.5.1	Problem	130
7.5.2	Solution	130
7.5.3	How It Works	130
7.6	Quaternion Display	133
7.6.1	Problem	133
7.6.2	Solution	133
7.6.3	How It Works	133
7.7	Making the IMU Belt	137
7.7.1	Problem	137
7.7.2	Solution	137
7.7.3	How It Works	137
7.8	Testing the System	138
7.8.1	Problem	138
7.8.2	Solution	138
7.8.3	How It Works	138
7.9	Classifying the Pirouette	140
7.9.1	Problem	140
7.9.2	Solution	141
7.9.3	How It Works	141
7.10	Data Acquisition GUI	145
7.10.1	Problem	145
7.10.2	Solution	145
7.10.3	How It Works	145
7.11	Hardware Sources	153

CONTENTS

8	Completing Sentences	155
8.1	Introduction	155
8.1.1	Sentence Completion	155
8.1.2	Grammar	156
8.1.3	Sentence Completion by Pattern Recognition	157
8.1.4	Sentence Generation	157
8.2	Generating a Database	158
8.2.1	Problem	158
8.2.2	Solution	158
8.2.3	How It Works	158
8.3	Creating a Numeric Dictionary	160
8.3.1	Problem	160
8.3.2	Solution	160
8.3.3	How It Works	160
8.4	Mapping Sentences to Numbers	161
8.4.1	Problem	161
8.4.2	Solution	161
8.4.3	How It Works	162
8.5	Converting the Sentences	163
8.5.1	Problem	163
8.5.2	Solution	163
8.5.3	How It Works	163
8.6	Training and Testing	164
8.6.1	Problem	164
8.6.2	Solution	164
8.6.3	How It Works	165
9	Terrain-Based Navigation	173
9.1	Introduction	173
9.2	Modeling Our Aircraft	173
9.2.1	Problem	173
9.2.2	Solution	173
9.2.3	How It Works	173
9.3	Generating Terrain	182
9.3.1	Problem	182
9.3.2	Solution	182
9.3.3	How It Works	182
9.4	Close-Up Terrain	186
9.4.1	Problem	186
9.4.2	Solution	186
9.4.3	How It Works	187

9.5	Building the Camera Model	188
9.5.1	Problem	188
9.5.2	Solution	188
9.5.3	How It Works	189
9.6	Plotting the Trajectory	192
9.6.1	Problem	192
9.6.2	Solution	193
9.6.3	How It Works	193
9.7	Creating the Training Images	195
9.7.1	Problem	195
9.7.2	Solution	195
9.7.3	How It Works	195
9.8	Training and Testing	198
9.8.1	Problem	198
9.8.2	Solution	198
9.8.3	How It Works	198
9.9	Simulation	203
9.9.1	Problem	203
9.9.2	Solution	203
9.9.3	How It Works	203
10	Stock Prediction	209
10.1	Introduction	209
10.2	Generating a Stock Market	209
10.2.1	Problem	209
10.2.2	Solution	209
10.2.3	How It Works	209
10.3	Creating a Stock Market	212
10.3.1	Problem	212
10.3.2	Solution	213
10.3.3	How It Works	213
10.4	Training and Testing	215
10.4.1	Problem	215
10.4.2	Solution	215
10.4.3	How It Works	215
11	Image Classification	225
11.1	Introduction	225
11.2	Using AlexNet	225
11.2.1	Problem	225
11.2.2	Solution	225
11.2.3	How It Works	225

CONTENTS

11.3	Using GoogLeNet	230
11.3.1	Problem	230
11.3.2	Solution	230
11.3.3	How It Works	230
12	Orbit Determination	235
12.1	Introduction	235
12.2	Generating the Orbits	235
12.2.1	Problem	235
12.2.2	Solution	235
12.2.3	How It Works	235
12.3	Training and Testing	243
12.3.1	Problem	243
12.3.2	Solution	243
12.3.3	How It Works	243
12.4	Implementing an LSTM	247
12.4.1	Problem	247
12.4.2	Solution	247
12.4.3	How It Works	247
13	Earth Sensors	251
13.1	Introduction	251
13.2	Linear Output Earth Sensor	253
13.2.1	Problem	253
13.2.2	Solution	253
13.2.3	How It Works	253
13.3	Segmented Earth Sensor	256
13.3.1	Problem	256
13.3.2	Solution	256
13.3.3	How It Works	256
13.4	Linear Output Sensor Neural Network	259
13.4.1	Problem	259
13.4.2	Solution	259
13.4.3	How It Works	259
13.5	Segmented Sensor Neural Network	263
13.5.1	Problem	263
13.5.2	Solution	264
13.5.3	How It Works	264
14	Generative Modeling of Music	269
14.1	Introduction	269
14.2	Generative Modeling Description	269

14.3	Problem: Music Generation	270
14.4	Solution	271
14.5	Implementation	274
14.6	Alternative Methods	283
15	Reinforcement Learning	289
15.1	Introduction	289
15.2	Titan Lander	289
15.3	Titan Atmosphere	292
	15.3.1 Problem	292
	15.3.2 Solution	292
	15.3.3 How It Works	292
15.4	Simulating the Aircraft	294
	15.4.1 Problem	294
	15.4.2 Solution	294
	15.4.3 How It Works	294
15.5	Simulating Level Flight	298
	15.5.1 Problem	298
	15.5.2 Solution	298
	15.5.3 How It Works	298
15.6	Optimal Trajectory	300
	15.6.1 Problem	300
	15.6.2 Solution	301
	15.6.3 How It Works	301
15.7	Reinforcement Example	308
	15.7.1 Problem	308
	15.7.2 Solution	308
	15.7.3 How It Works	308
	Bibliography	319
	Index	323
