

Contents

Introduction: Garlic xi

*in which the stinky bulb establishes Korea, frightens the Brits
and tells you why you will want to read this book*

PART ONE

Overcoming Prejudices

1 Acorn 3

*in which the acorn-eating pigs of southern Spain and
acorn-loving Koreans tell you how culture is not as
important as you think in determining economic outcomes*

2 Okra 12

*in which the 'lady finger' reveals how blinkered and
misleading the language of free-market economics is*

3 Coconut 21

*in which the brown fruit reveals why it is wrong to believe that
various 'brown' people are poor because they don't work hard*

PART TWO

Becoming More Productive

4 Anchovy 31

*in which the small fish, which used to give countries
not just rich flavours but fabulous riches, turns out
to be an ambassador for industrialization*

5 Prawn – or Shrimp? 39

*in which the crustacean is shown to be an insect in disguise
that tells us why developing countries need to use protectionism
against superior foreign competition*

Contents

6 Noodle 46

in which the intertwined story of two noodle-obsessed nations makes us re-examine the way we think about entrepreneurship and corporate success

7 Carrot 56

in which the once-outrageous idea that a carrot can be orange helps us see why and how we need to fix the patent system

PART THREE

Doing Better Globally

8 Beef 65

in which the most controversial meat reveals how free trade doesn't mean freedom for all

9 Banana 76

in which the world's most productive fruit tells us how global corporations can be positive forces for developing countries but only if they are used in the right way

10 Coca-Cola 86

in which a drink that resembles an ageing rock band tells us why so many developing countries are unhappy with the prevailing economic ideology

PART FOUR

Living Together

11 Rye 97

in which this quintessential Northern European grain clears up a few misunderstandings about the welfare state

12 Chicken 105

in which the bird that everyone loves to eat but no one takes seriously teaches us the true meaning of economic equality and fairness

Contents

- 13 Chilli 113
*in which the trickster berry helps us see how care work
is neglected and undervalued, despite being at the
foundation of our economy and society*

PART FIVE

Thinking About the Future

- 14 Lime 125
*in which the British navy and the Brazilian national drink
come together to help us think about the challenges
of climate change*
- 15 Spices 134
*in which we learn how black pepper, cinnamon nutmeg and
clove gave birth to the modern corporation, which has made
capitalism a great success but is now slowly strangling it*
- 16 Strawberry 141
*in which the berry that is not a berry helps us think
about the rise of the robots and the future of work*
- 17 Chocolate 149
*in which the milk chocolate bar reveals the secret of
Swiss economic prosperity, which has little to do
with secretive banking or upmarket tourism*

Conclusion: How to Eat (Economics) Better 159
