Contents

Preface ..... **v**

I. Introduction **1**

1. Strongly Continuous Semigroups 2
   a. Basic Properties 2
   b. Standard Constructions 8
2. Examples 11
   a. Finite-Dimensional Systems: Matrix Semigroups 11
   b. Uniformly Continuous Operator Semigroups 17
3. More Semigroups 19
   a. Multiplication Semigroups on $C_0(\Omega)$ 20
   b. Multiplication Semigroups on $L^p(\Omega, \mu)$ 26
   c. Translation Semigroups 30

II. Semigroups, Generators, and Resolvents **34**

1. Generators of Semigroups and Their Resolvents 35
2. Examples Revisited 46
   a. Standard Constructions 46
   b. Standard Examples 50
   c. Sobolev Towers 57
3. Generation Theorems 63
   a. Hille–Yosida Theorems 63
   b. The Lumer–Phillips Theorem 74
   c. More Examples 83

4. Analytic Semigroups 90
5. Further Regularity Properties of Semigroups 104
6. Well-Posedness for Evolution Equations 110

III. Perturbation of Semigroups 115
1. Bounded Perturbations 115
2. Perturbations of Contractive and Analytic Semigroups 124

IV. Approximation of Semigroups 136
1. Trotter–Kato Approximation Theorems 136
   a. A Technical Tool: Pseudoresolvents 138
   b. The Approximation Theorems 141
   c. Examples 145
2. The Chernoff Product Formula 148

V. Spectral Theory and Asymptotics for Semigroups 156
1. Spectrum of Semigroups and Generators 157
   a. Spectral Theory for Closed Operators 157
   b. Spectral Theory for Generators 168
2. Spectral Mapping Theorems 176
   a. Examples and Counterexamples 176
   b. Spectral Mapping Theorems for Semigroups 179
3. Stability and Hyperbolicity of Semigroups 185
   a. Stability Concepts 186
   b. Characterization of Uniform Exponential Stability 188
   c. Hyperbolic Decompositions 191
4. Convergence to Equilibrium 194

VI. Positive Semigroups 205
1. Basic Properties 205
2. Spectral Theory for Positive Semigroups 207
3. Convergence to Equilibrium, Revisited 211
4. Semigroups for Age-Dependent Population Equations 216

Appendix
A. A Reminder of Some Functional Analysis and Operator Theory 222

References 231

Selected References to Recent Research 237

List of Symbols and Abbreviations 240

Index 243
