Introduction	1
---------------------	----------

Part I: The Opportunity

1 The value of nature for local development	7
1.1 Local development's biggest asset	9
1.2 A potential not fully recognized	12
1.3 What can local policy makers do?	13
1.4 Ecosystem services: an overview	15
1.5 Who is affected?	21
1.6 The natural relation between biodiversity and public health	26
1.7 Linking local policy, ecosystem services and climate change	30

Part II: The Tools

2 Conceptual frameworks for considering the benefits of nature	35
2.1 How to assess nature's benefits: a stepwise approach	37
2.2 An overview of the frameworks	41
2.3 Action points	53
3 Tools for valuation and appraisal of ecosystem services in policy making	57
3.1 The rationale for valuing ecosystem services and biodiversity	60
3.2 Valuation methods	61
3.3 Decision support frameworks: cost-benefit analysis	72
3.4 Alternative decision support tools and frameworks	78
3.5 Conclusions and action points	92

Part III: Practical Applications: Planning and Management

4	Ecosystem services in cities and public management	99
4.1	Benefits of including ecosystem services in public management	101
4.2	Pressure and potential of urban areas	109
4.3	Options for local managers	113
4.4	Integrated management: for responsible public management	120
4.5	Action points for local governments	125
5	Ecosystem services in rural areas and natural resource management	129
5.1	Agriculture	132
5.2	Fisheries and wetlands	139
5.3	Forests and watershed management	142
5.4	Managing ecosystems for tourism	147
5.5	Ecosystem resilience and disaster mitigation	151
5.6	Assessing and integrating ecosystem services in natural resource management	155
6	Spatial planning and environmental assessments	165
6.1	Challenges for spatial planning	167
6.2	Integrating ecosystems services in spatial planning	170
6.3	Integrating biodiversity: making the connections	179
6.4	Potential for progress: action points for local policy	181
6.5	Integrating ecosystems and biodiversity in environmental assessment	183
6.6	When and how to integrate ecosystem services in EIA and SEA	190
6.7	Lessons learned from practice	191
7	Ecosystem services and protected areas	195
7.1	Why are protected areas important in local policy?	197
7.2	Getting involved in local conservation management	203
7.3	Reasons for assessing ecosystems services of protected areas	206
7.4	Action points	215

Part IV: Practical Applications: Creating Markets

8	Payments for ecosystem services	223
8.1	What PES is and how it works	225
8.2	Designing PES schemes	231
8.3	Making PES schemes work locally	245
9	Creating markets to conserve biodiversity: conservation banking	251
9.1	The role of local policy	253
9.2	Offsetting	254
9.3	Conservation banking	256
9.4	How to make it work: preconditions for successful conservation banking	258

10 Certification and labelling	263
10.1 Incentives for conserving ecosystem services and biodiversity	265
10.2 How do certification and labelling work?	267
10.3 The role of local policy in certification	269
10.4 Potential pitfalls and challenges of labelling and certification	275
10.5 Action points: local policy makers engaging in certification	277

Part V: Conclusions

11 Making your natural capital work for local development	281
11.1 Ecosystem services in local policy: some key lessons	283
11.2 Applying the TEEB stepwise approach to appraising nature's benefits	285
11.3 Making ecosystem services count: dealing with conflicts	289
11.4 It is better to err on the side of caution	299
Appendix: Practical advice, FAQs, tools and databases	301
