<i>Preface</i> .....	v
<i>Contributors</i> .....	ix

## PART I ENZYME LIBRARIES PREPARATION AND SCREENING

1 Preparation of Soil Metagenome Libraries and Screening for Gene-Specific Amplicons .....	3
<i>Luke J. Stevenson, David F. Ackerley, and Jeremy G. Owen</i>	
2 Ultrahigh-Throughput Screening of Metagenomic Libraries Using Droplet Microfluidics .....	19
<i>Davide Agostino Cecchini, Mercedes Sánchez-Costa, Alejandro H. Orrego, Jesús Fernández-Lucas, and Aurelio Hidalgo</i>	
3 Synthetic DNA Libraries for Protein Engineering Toward Process Improvement in Drug Synthesis .....	33
<i>Michele Tavanti</i>	

## PART II DIRECTED EVOLUTION

4 In Silico Prediction Methods for Site-Saturation Mutagenesis .....	49
<i>Ge Qu and Zhoutong Sun</i>	
5 Recombination of Compatible Substitutions by 2GenReP and InSiReP .....	71
<i>Haiyang Cui, Mehdi D. Davari, and Ulrich Schwaneberg</i>	

## PART III SEMI-RATIONAL AND DE NOVO DESIGN

6 Using the Evolutionary History of Proteins to Engineer Insertion-Deletion Mutants from Robust, Ancestral Templates Using Graphical Representation of Ancestral Sequence Predictions (GRASP) .....	85
<i>Connie M. Ross, Gabriel Foley, Mikael Boden, and Elizabeth M. J. Gillam</i>	
7 Resurrecting Enzymes by Ancestral Sequence Reconstruction .....	111
<i>Maria Laura Mascotti</i>	
8 Expression and In Vivo Loading of De Novo Proteins with Tetrapyrrole Cofactors .....	137
<i>Paul Curnow and J. L. Ross Anderson</i>	

## PART IV RATIONAL DESIGN

9 Rational-Design Engineering to Improve Enzyme Thermostability .....	159
<i>Vinutsada Pongsupasa, Piyanuch Anuwat, Somchart Maenpuen, and Thanyaporn Wongnate</i>	

10	Using Molecular Simulation to Guide Protein Engineering for Biocatalysis in Organic Solvents. . . . .	179
	<i>Haiyang Cui, Markus Vedder, Ulrich Schwaneberg, and Mehdi D. Davari</i>	
11	In Silico Engineering of Enzyme Access Tunnels . . . . .	203
	<i>Alfonso Gautieri, Federica Rigoldi, Archimede Torretta, Alberto Redaelli, and Emilio Parisini</i>	
12	Quantum-Mechanical/Molecular-Mechanical (QM/MM) Simulations for Understanding Enzyme Dynamics . . . . .	227
	<i>Rimsha Mehmood and Heather J. Kulik</i>	
13	Computational Enzyme Design at Zymvol. . . . .	249
	<i>Emanuele Monza, Victor Gil, and Maria Fatima Lucas</i>	
 PART V BIOCATALYTIC PROCESS DEVELOPMENT		
14	Advanced Enzyme Immobilization Technologies: An Eco-friendly Support, a Polymer-Stabilizing Immobilization Strategy, and an Improved Cofactor Co-immobilization Technique . . . . .	263
	<i>Ana I. Benítez-Mateos and Francesca Paradisi</i>	
15	Chemical Reaction Engineering to Understand Applied Kinetics in Free Enzyme Homogeneous Reactors. . . . .	277
	<i>Alvaro Lorente-Arevalo, Alberto Garcia-Martin, Miguel Ladero, and Juan M. Bolivar</i>	
16	Enzymatic Oxidative Cascade for Oxofunctionalization of Fatty Acids in One-Pot . . . . .	321
	<i>Somayyeh Gandomkar and Mélanie Hall</i>	
17	CRISPR-Cas9 Editing of the Synthesis of Biodegradable Polyesters Polyhydroxyalkanoates (PHA) in <i>Pseudomonas putida</i> KT2440. . . . .	341
	<i>Si Liu, Tanja Narancic, Chris Davis, and Kevin E. O'Connor</i>	
	<i>Index</i> . . . . .	359
