Preface	v
1 The Bergman Spaces	1
1.1 Bergman Spaces	1
1.2 Some L^p Estimates	7
1.3 The Bloch Space	13
1.4 Duality of Bergman Spaces	17
1.5 Notes	22
1.6 Exercises and Further Results	23
2 The Berezin Transform	28
2.1 Algebraic Properties	28
2.2 Harmonic Functions	32
2.3 Carleson-Type Measures	38
2.4 BMO in the Bergman Metric	42
2.5 A Lipschitz Estimate	46
2.6 Notes	49
2.7 Exercises and Further Results	49
3 A^p-Inner Functions	52
3.1 A^p_α -Inner Functions	52
3.2 An Extremal Problem	55
3.3 The Biharmonic Green Function	59
3.4 The Expansive Multiplier Property	66

3.5	Contractive Zero Divisors in A^p	71
3.6	An Inner-Outer Factorization Theorem for A^p	78
3.7	Approximation of Subinner Functions	86
3.8	Notes	94
3.9	Exercises and Further Results	95
4	Zero Sets	98
4.1	Some Consequences of Jensen's Formula	98
4.2	Notions of Density	104
4.3	The Growth Spaces $\mathcal{A}^{-\alpha}$ and $\mathcal{A}^{-\infty}$	110
4.4	$\mathcal{A}^{-\alpha}$ Zero Sets, Necessary Conditions	112
4.5	$\mathcal{A}^{-\alpha}$ Zero Sets, a Sufficient Condition	119
4.6	Zero Sets for A_α^p	128
4.7	The Bergman-Nevanlinna Class	131
4.8	Notes	133
4.9	Exercises and Further Results	134
5	Interpolation and Sampling	136
5.1	Interpolation Sequences for $\mathcal{A}^{-\alpha}$	136
5.2	Sampling Sets for $\mathcal{A}^{-\alpha}$	152
5.3	Interpolation and Sampling in A_α^p	155
5.4	Hyperbolic Lattices	165
5.5	Notes	171
5.6	Exercises and Further Results	172
6	Invariant Subspaces	176
6.1	Invariant Subspaces of Higher Index	176
6.2	Inner Spaces in A_α^2	180
6.3	A Beurling-Type Theorem	181
6.4	Notes	186
6.5	Exercises and Further Results	187
7	Cyclicity	190
7.1	Cyclic Vectors as Outer functions	190
7.2	Cyclicity in A^p Versus in $\mathcal{A}^{-\infty}$	191
7.3	Premeasures for Functions in $\mathcal{A}^{-\infty}$	193
7.4	Cyclicity in $\mathcal{A}^{-\infty}$	208
7.5	Notes	214
7.6	Exercises and Further Results	214
8	Invertible Noncyclic Functions	216
8.1	An Estimate for Harmonic Functions	217
8.2	The Building Blocks	219
8.3	The Basic Iteration Scheme	222
8.4	The Mushroom Forest	230

8.5	Finishing the Construction	235
8.6	Two Applications	238
8.7	Notes	239
8.8	Exercises and Further Results	240
9	Logarithmically Subharmonic Weights	242
9.1	Reproducing Kernels	242
9.2	Green Functions with Smooth Weights	253
9.3	Green Functions with General Weights	262
9.4	An Application	267
9.5	Notes	269
9.6	Exercises and Further Results	269
	References	274
	Index	282
